

USA Automotive Aftermarket Flat Rate Repair Prices

General Repair *Have your tools repaired by our factory experts!*

Flat Rate Repair

Flat rate repair charges include labor and all necessary parts needed to restore the tool to approved factory performance levels. Your flat rate repair discount will apply. Dynabrade will only repair standard items that were returned with the tool (i.e. if accessories such as contact arms, pads, etc. are missing from the tool or damaged, they will not be replaced. They will need to be purchased separately). We may determine, based on our examination, that a product is beyond economical repair. If so determined, products will be returned to sender free of charge. **Important: To minimize "Turnaround-Time" of your repair, please indicate on your purchase order: "Flat Rate Repair Charge To Apply". This will eliminate the need for any notification to be faxed to you.**

Itemized Estimate

In rare cases where an itemized estimate is required prior to approval, a \$60.00 flat rate labor charge, plus parts, will apply. If the repair is not approved, the \$60.00 net charge will still apply. Tool will be returned unassembled unless otherwise requested. Please note on your purchase order "Estimate Required."

Warranty – Flat Rate Repair

Tools, assemblies and parts that are repaired will carry a 90-day warranty. This warranty is limited to the repair or replacement, as Dynabrade, Inc. may elect, of any defective parts which are replaced on the original repair, regarding which, upon discovery of the defects the purchaser has given written notice. Transportation costs are not included. Dynabrade, Inc. does not make any warranty, expressed or implied, other than the warranty contained herein. When returning a tool for which you are requesting warranty repair, please include a copy of your original invoice to the end user indicating date, serial number and model number. We will then inspect the tool to determine if the problem is covered by our standard warranty and advise if we determine otherwise.
