Leveling Jacks
For Precision Machine Leveling and Support

Ensure Consistent Stability and Optimal Machine Performance

Quality Features:
- Increase Machine Efficiency
- Reduce Vibration and Noise
- Extend Machine Life
- Automatically Compensate for Uneven Floors
- Easily Adjustable to Suit Any Workplace

Ideal for use with:
- Boring machines
- CNC Machines
- Cut-Off Saws
- Electrical Discharge Machines
- Gantry Machines
- Generators
- Grinders
- Injection Molders
- Lathes
- Machining Centers
- NC Drilling Machines
- Planer Mills
- Robots
- Roll Grinders
- Transfer Mills
- Much More!
DYNABRADE Leveling Jacks
For Precision Machine Leveling and Support

Protect your most important investment – your company machinery – with Dynabrade Leveling Jacks

Solid, easily adjustable, simple and efficient, Dynabrade Leveling Jacks are utilized throughout the world for leveling and supporting weights of up to 30,000 pounds (13,620kg). Offered in two styles, Wedge-Action and Vertical Motion, Dynabrade Leveling Jacks provide consistent stability while ensuring optimal machine performance!

Features:

• Compact, lightweight design
• Self-aligning base automatically compensates for uneven floor
• Grooved top allows oils and liquids to run out; also helps dissipate vibration
• Black oxide finish resistant to corrosion and rust
• Easy adjustment with hand-held wrench
• Virtually indestructible, Dynabrade Leveling Jacks will dramatically increase the efficiency and life of your machinery!

Optional Features:

• Vibration and noise are both reduced as your machinery is leveled and supported by Dynabrade Leveling Jacks, when used in conjunction with Vibration-Absorbing Mounting Pads (see page 4).

All Leveling Jacks

Lower surface of wedge is specially contoured to float laterally within concave base unit, automatically compensating for uneven floor conditions up to 5 degrees of slope.

WEDGE-ACTION Leveling Jacks

A significant improvement over conventional wedge-action devices, the Dynabrade Wedge-Action Leveling Jack is a two-piece design that provides solid support from 3,000 to 9,000 pounds (1,362 kg to 4,086 kg).

• This is a low profile leveling jack that is ideal for applications constricted by reduced height. All models have a self-aligning base that automatically compensates for uneven floor levels, correcting inconsistencies of up to 5 degrees. Wedge action allows easy adjustment of height (1/4” - 3/8” / 6 mm - 10 mm) with the turn of a wrench.

Dynabrade Wedge-Action Leveling Jacks are available separately, and with Vi-Sorb Mounting Pad included. See chart on page 4 for details.

Wedge-Action Leveling Jack Models

<table>
<thead>

</tr>
</tbody>
</table>

Note: See page 4 for complete Assemblies including; a Leveling Jack w/ ViSorb Pad in 3 different sizes (1/4", 1/2" or 3/4").
**VERTICAL MOTION Leveling Jacks**

Dynabrade Vertical Motion Leveling Jacks combine the advantages of a wedge-action jack with vertical lift capabilities, in one unique and practical unit. Easily supporting up to 30,000 pounds (13,620 kg), this is the mightiest leveling jack in the industry!

- **Vertical Motion leveling Jacks** may be used with or without anchor bolts, depending upon installation. When anchor bolts are used, they pass through the entire assembly without interfering with the leveling action. Once again, easy alignment is achieved with only a hand wrench!

Dynabrade Vertical Motion leveling Jacks are available separately, and with Vi-Sorb or Vi-Damp II Mounting Pad included. See chart on page 4 for details.

---

There is no lateral stress or shifting with the **Vertical Motion Jack**. It converts horizontal movement into vertical lift by means of two interfacing planes. As hex head lift screw (A) is turned, the lower wedge (B) slides forward against the included plane of the top plate (C), causing it to rise vertically in a smooth positive manner!

---

**Note:** See page 4 for complete Assemblies including: a Leveling Jack w/ ViSorb Pad or ViDamp II Pad in 3 different sizes (1/4”, 1/2” or 3/4”).
**VIBRATION-ABSORBING Mounting Pads**

The use of Vibration-Absorbing Mounting Pads in conjunction with Dynabrade Leveling Jacks is recommended, to reduce the damaging effects of vibration. Utilizing a unique design, these pads offer vibration-absorbing capacity of up to 90%!

**Features:**

- **Vibration-Absorbing Mounting Pads** are offered in three thicknesses: 1/4", 1/2" and 3/4" (6 mm, 13 mm and 19 mm). Each successive thickness provides increased vibration protection (see chart). All pads are sized to perfectly fit Dynabrade Leveling Jacks.
- In addition, **Mounting Pads** reduce the transmission of internal machine noise to the building structure, and dissipate transmitted vibrations from one machine to another. In many cases they also eliminate the need for anchor bolts by stopping machine creepage. Pads are resistant to oil, grease and acids. They resist breakdown under load and over time.

**Vi-Sorb Pads**

- Provide basic vibration reduction. Available with all models of Dynabrade Leveling Jacks, and also sold separately (see chart).

**Vi-Damp II Pads**

- With innovative polymer construction that affords increased vibration reduction at heavier weights. Available with Dynabrade Leveling Jacks of 15,000-30,000 pound capacity (6,810-13,620 kg). Highly recommended! Also sold separately (see chart).
