APPLICATIONS & MARKETS

- Surface finishing on any type of wood, metal composite, solid surface, filler, e-coat, primer, paint coat, clear coat and gel coat.
- Used in Aerospace, Marine, AOEM, Automotive Aftermarket, Furniture, Wood and General Metal Industries.

FEATURES & BENEFITS

- Anti-loading topcoat provides longer life and good cut rate without wild scratches.
- Open coat of aluminium oxide grain.
- Coated abrasive discs with paper backing with Velcro attachment.
- Resinoid bond ensures excellent performance and durability.
- Suitable for grinding new generation water based lacquers.
- Excellent dust reduction with the 21 hole disc system for a safe and work-friendly environment.
