Applications & markets

DYNAWHITE	<ul style="list-style-type: none">• Removes deep scratches on any kind of surface.• Removes light defects such as water spots, swirl and sanding marks.• Offers an aggressive cut that can flatten soft orange-peel effect in the Auto Aftermarket.• Can be used to prepare the car body for the subsequent high gloss surface finish application.
DYNATEAL	<ul style="list-style-type: none">• AOEM, industrial or wood polishing, DynaTeal achieves hologram-free surface finish on any type of clear coat.• Excellent to obtain hologram-free surface finish on Automotive Aftermarket scratch resistant clear coats.
DYNAORANGE	<ul style="list-style-type: none">• Leaves a high-gloss, hologram-free surface finish on standard Automotive clear coats.• Final finish operation combined with more aggressive compounds (e.g. DynaWhite) for multiple steps polishing process in Automotive Aftermarket.

Surface finishing

BENEFITS

- Increased productivity and reduced overall costs.
- Enhanced final high gloss surface finish.
- Avoids swirl and bloom marks as well as holograms when used with our random orbital polishers.

WIPES

Always use Dynabrade Microfibre Wipes to clean the surface between steps to avoid scratches.

Pack of 20 consists of 10 blue and 10 yellow wipes
